CONTENTS

Vol. XIX, Issue Nos. 91–93, 1956

Journal of Polymer Science

ISSUE NO. 91, JANUARY

G. AYREY, C. G. MOORE, and W. F. WATSON: Mastication. Part III. Chemical Verification of the Mechanical Degradation Mechanism of Cold Mastication 1

E. R. BERTOZZI, F. O. DAVIS, and E. M. FETTES: Disulfide Interchange in Polysulfide Polymers 17

S. H. MARON, W. VON FISCHER, W. M. ELLSLAGER, and G. SARVADI: Emulsion Polymerization of Butadiene and Styrene in Presence of Carbon Black. I. Persulfate Initiation 29

BERNHARD GROSS and RAYMOND M. FUOSS: Ladder Structures for Representation of Viscoelastic Systems 39

C. S. MARVEL, ROBERT M. NOWAK, MOSES PASSER, W. K. TAFT, and B. G. LABBE: The Copolymer of 2-Methyl-3-*n*-butyl-1,3-butadiene and Styrene 51

C. S. MARVEL, S. L. JACOBS, W. K. TAFT, and B. G. LABBE: Alkyl Thiolacrylates: Their Preparation and Polymerization 59

JEROME SALDICK: Thermal Initiation of Vinyl Polymerization by Ceric Solutions 73

L. MANDELKERN, M. TRYON, and F. A. QUINN, JR.: The Melting Behavior of Polybutadienes 77

RALPH L. DANNLEY and EDWARD L. KAY: The Incorporation of Aroyloxy Radicals in Polymer Molecules 87

E. H. LEE and J. A. MORRISON: A Comparison of the Propagation of Longitudinal Waves in Rods of Viscoelastic Materials 93

ARTHUR V. TOBOLSKY and EPHRAIM CATSIFF: Elastoviscous Properties of Polyisobutylene (and Other Amorphous Polymers) from Stress-Relaxation Studies. IX. A Summary of Results 111

JOHN L. KICE: Inhibition of Polymerization. II. Methyl Acrylate 123

KURT ROSSMANN: Improvement of Bonding Properties of Polyethylene 141

D. J. BUCKLEY and S. B. ROBISON: Ozone Attack on Rubber Vulcanizates 145

W. R. KRIGBAUM: Lattice Model Calculation of the Configurational Entropy Change for Athermal Mixtures 159

J. H. BAXENDALE and G. W. MADARAS: Kinetics and Heats of Copolymerization of Acrylonitrile and Methyl Methacrylate 171

HIROSHI TERAYAMA: Viscometric and Light Scattering Behavior of Polyelectrolyte Solutions in the Presence of Added Electrolytes. 181

LETTERS TO THE EDITORS

Olov E. Öhrn: Further Comments on the Influence of Adsorption on Viscosity Measurements 199
Motowo Takayanagi: Molecular Weight Dependence of Rate of Crystallization in Polyesters 200
Minoru Imoto and Kiichi Takemoto: Influence of Dimethylaniline on the Hyperconjugation Effect in Radical Polymerization 205
Atsuo Nishioka and Ryuzo Koyama: Apparent Molecular Weight of Polytrifluorochloroethylene 207
Mieczyslaw Wronski: Theory of Kinetics of Xanthation Reaction 210
Mieczyslaw Wronski: Theory of Viscose Ripening 212
Mieczyslaw Wronski: Amperometric Titration of Viscose 213
A. W. Craig and D. A. Henderson: A Viscometer for Dilute Polymer Solutions 215
J. Behr, R. B. Mesrobian, A. J. Restaino, D. S. Ballantine, A. Glines, and D. J. Metz: *G* Values of Gamma-Ray Initiation of Vinyl Polymerization and Their Relation to Graft Copolymer Formation 219

Dipole moments, polyoxymethylene dimethyl ether, 365
Disulfides, interchange in polysulfide polymers, 17
Elastomers, ultimate properties, 275
Elastoviscous properties, polyisobutylene, 111
Electrical conductivity, determination in crosslinked polyelectrolytes, resins, and gels, 382
Electron exchange polymers, 307
Electrons, high-energy, for initiation of solid state polymerization, 455
Emulsion polymerization, butadiene and styrene, 29
chloroprene, 547, 563
Formaldehyde-hydroquinone polymers, 307
Free radical attack on double bonds, 587
Gelatin films, method for casting, 380
Gels, electrical conductivity determination, 382
Graft copolymer formation, relation to *G* values of gamma-ray initiation of vinyl polymerization, 219, 578
Hevea, reaction with ozone, 503
Hydroquinone-formaldehyde polymers, 307
Infrared methods, for crystallinity studies of polyamides, 401
Infrared studies, chlorinated rubbers, 323
Inhibition of polymerization, methyl acrylate, 123
Initiation, by persulfate in emulsion polymerization of butadiene and styrene, 29
Initiation, thermal, of vinyl polymerization by ceric solutions, 73
Interferometric micromethod for diffusion measurements, 337
Intrinsic viscosity, Hart's method of single point determination, 379
Kinetics, of polymerization, 583
of xanthation reaction, theory, 210
Ladder systems, for representation of viscoelastic systems, 39
Lattice model calculation of the configurational entropy change for athermal mixtures, 159
Light scattering, for determination of second virial coefficient in dilute polymer solutions, 495
of polyelectrolyte solutions, 181
by polyethyl methacrylate solutions, 463
by polyvinyl acetate solutions, 477
Melting range, semicrystalline polymers and copolymers, 347
Methyl acrylate, inhibition of polymerization, 123
2-Methyl-3-*n*-butyl-1,3-butadiene, and styrene copolymer, 51
Methyl methacrylate, kinetics and heats of copolymerization with acrylonitrile, 171
polymerization, sulfinic acid derivatives as accelerators in, 311
Molecular weight distribution, low conversion polystyrene sample, 519
Osmometer, compact, 437

Ozone, attack on rubber vulcanizates, 145
reaction with Hevea and acrylonitrile-butadiene rubbers, 503
Persulfate, for initiation in emulsion polymerization of butadiene and styrene, 29
Photoelastic behavior, variation with temperature, 359
Polyamides, crystallinity studies, 401
Polybutadienes, melting behavior, 77
Polydimethylsiloxanes, irradiated, use in investigation of the theory of rubber elasticity, 297
Polyelectrolytes, electrical conductivity determination, 382
viscometric and light scattering behavior, 181
Polyesters, molecular weight dependence of rate of crystallization, 200
Polyethyl methacrylate, 463
Polyethylene, bonding properties, 141
determination of methyl content in, 353
Polyisobutylene, elastoviscous properties, 111
relation of apparent viscosity and temperature in, 255
Polymer network, chain scissions in, 445
Polymer solutions, concentrated, diffusion in, 337
determination of second virial coefficient by light scattering data, 495
Polyoxymethylene dimethyl ethers, dipole moments and structures, 365
Polystyrene, molecular weight distribution of a low conversion sample, 519
Polysulfide polymers, disulfide interchange, 17
Polytrifluorochloroethylene, apparent molecular weight, 207
Polyvinyl acetate, light scattering and viscosity studies, 477
Polyvinylpyrrolidone, diffusion of sucrose in solutions of, 337
Radical polymerization, dimethylaniline influence on hyperconjugation effect, 205
Radicals, aroyloxy, incorporation in polymer molecules, 87
Raman spectra, allyl diglycol carbonate, 331
Reactivity constants in copolymerization, 582
Resins, electrical conductivity determination, 382

Structures, polyoxymethylene dimethyl ethers, 365
Styrene, emulsion polymerization with butadiene, 29
and 2-methyl-3-*n*-butyl-1,3-butadiene copolymer, 51
Sulfinic acid derivatives, as accelerators in methyl methacrylate polymerization, 311
Thermal initiation, of vinyl polymerization by ceric solutions, 73
Vinyl polymerization, *G* values of gamma-ray initiation of, 219, 578
thermal initiation by ceric solutions, 73
Vinylpyridine, mechanism of chain initiation and chain transfer in polymerization of, 285
Vinyl silanes, copolymerizations, 373
Viscoelastic materials, propagation of longitudinal waves in rods of, 93
Viscoelastic systems, representation by ladder systems, 39
Viscometer, for dilute polymer solutions, 215
for use at high temperatures, 591
Viscose, amperometric titration, 212
Viscose ripening, theory, 212
Viscosity, apparent, relation to temperature in polyisobutylene, 255
influence of adsorption on measurements of, 199
of polyelectrolyte solutions, 181
of polyethyl methacrylate solutions, 463
of polyvinyl acetate solutions, 477
Waves, longitudinal, propagation in rods of viscoelastic materials, 93
Xanthation reaction, theory of kinetics, 210
X-ray methods, for crystallinity studies of polyamides, 401
